PROFESSIONAL SUMMARY

Computer Science Engineering graduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience in Python, machine learning, web technologies, and cloud-based applications. Experienced in developing AI/ML solutions and research automation applications through academic projects and an IBM SkillsBuild internship. Seeking an entry-level Software Engineer role to apply technical skills and contribute to real-world software solutions.

EDUCATION

Raghu Institute of Technology 2022–2026
B.Tech in Computer Science Engineering (AI & ML) *CGPA: 8.28/10*

Sri Chaitanya Junior College 2020–2022
Intermediate Education *81.4%*

Amaravathi Group of Schools 2019–2020
Secondary Schooling (SSC) *94.83%*

TECHNICAL SKILLS

Programming: Python, Object-Oriented Programming
Databases & Web: MySQL, HTML, CSS, JavaScript, Streamlit
AI/ML: Machine Learning, Scikit-learn, TensorFlow, Pandas, NumPy

INTERNSHIP

IBM SkillsBuild Internship – AI & Cloud Intern *2025*
Virtual Internship

- Developed an automated Research Agent using Python, LangGraph, and the ReAct framework for academic research and information processing.
- Integrated multiple third-party web APIs to retrieve real-time information and automate research workflows.
- Deployed the application on IBM Watsonx Cloud, gaining practical experience in cloud-based application deployment and integration.
- Automated text extraction and report generation workflows to reduce manual processing and improve research task efficiency.
- Contributed to project development and delivery as part of a virtual project team while managing assigned tasks.

TECHNICAL PROJECTS

Automated Land Cover Classification Using Dual-Sensor Satellite Data *Final Year Project*

- Developed a cloud-based data processing application using Google Earth Engine, combining Landsat-8 optical data and Sentinel-1 radar data for land-cover classification.
- Implemented automated data preprocessing and modular pipeline components for preparing satellite data for machine learning classification.
- Trained and evaluated a multi-class classification model achieving **72.39% accuracy** across four terrain categories.

GlucoSense – AI-Based Diabetes Detection *Machine Learning Project*

- Developed a machine learning model for diabetes prediction achieving **92% classification accuracy** using structured data-processing and model-training workflows.
- Built an interactive web application that accepts user inputs and provides real-time prediction results through a user-friendly interface.
